EDUCATION

Canara Engineering College

Bachelor of Engineering in Computer Science and Engineering

Mangalore, India

2023 - Present (8.53 CGPA)

Saraswati PU College

Pre-university course-PCMB

Kumta, Karnataka

2021 - 2023 (93.5%)

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, SQL

Frontend: React.js, HTML, CSS

Backend: Node.js, Express.js, FastAPI

Database: MySQL, MongoDB

Developer Tools: Git, GitHub, VS Code, Postman

PROJECTS

AirGuard | *Python, FastAPI, PostgreSQL, React, ESP32, Arduino IDE*

2026

- Developed an AI-powered IoT wearable e-nose mask using ESP32 and gas sensors for real-time air quality monitoring and safety alerts.
- Built and trained a Random Forest regression model for current AQI prediction and a separate forecasting model for next-day AQI estimation using historical data.
- Designed and implemented REST APIs using FastAPI for sensor data ingestion, AQI prediction, and dashboard integration, enabling real-time monitoring, analytics, and alerts.

Complaint Escalation Management System | *Java, Spring Boot, Spring Security, JWT, React.js, MySQL*

2026

- Developed a full-stack complaint management platform with JWT authentication and role-based access control for Customers, Employees, Managers, and Admins.
- Implemented complaint lifecycle workflows including creation, assignment, status tracking, comments, attachments, history management, feedback, and SLA-based escalation.
- Designed scalable REST APIs using Spring Boot, Spring Data JPA, DTO architecture, validation, global exception handling, Swagger documentation, and automated testing.

CottonCare | *Python, TensorFlow, Keras, OpenCV*

2025

- Developed an AI-based cotton disease detection system using computer vision and deep learning to classify diseases from cotton leaf images.
- Built and trained CNN models using TensorFlow and Keras with image preprocessing techniques such as resizing, normalization, and noise reduction.
- Created an offline prediction application enabling farmers to upload leaf images and receive automated disease identification with recommended treatments.

EXPERIENCE

- Glowlogics - Full Stack Web Development Intern (2026 - Present):** Currently gaining hands-on experience in full-stack web development using HTML, CSS, JavaScript, React.js, Node.js, and MongoDB, while contributing to the development of responsive web applications.

ACHIEVEMENTS

- NPTEL Programming in Java:** Earned Elite + Gold certification and ranked among the top 5% of learners.
- Udbhava 2025 – National Level Hackathon:** Built an AI-driven Judicial Document Summarizer and qualified for the second round of the competition.

COURSES AND CERTIFICATIONS

- Python and Django Framework Course (Udemy)**
- Azure Fundamentals: Cloud Computing (Infosys Springboard)**
- Introduction to MongoDB (MongoDB University)**
